Agentic AI

INDUSTRY

Creator Economy / Digital Media / Marketing /
Social Media

PLATFORM / TECH

Agentic AI, Generative AI, LLMs, NLP,
Recommendation Systems, Web Application,
Content Calendar, Data Analytics, Social
Media APIs

SCOPE

Content Planning / Creator Workflow Automation / Content Strategy / Social Media Management

DESCRIPTION

Develop an AI-powered content planning agent that helps creators plan and organize their content strategy across digital platforms. The agent should understand the creator's niche, audience, content goals, preferred platforms, publishing frequency, and existing content. It should generate content ideas, organize them into a content calendar, recommend suitable formats and topics, and help creators maintain a consistent publishing schedule.

The system should support conversational planning, allowing creators to modify ideas, schedules, topics, and priorities using natural language. It should also analyze available performance information to provide content-planning insights and suggest future topics or formats.

KEY DELIVERABLES

- ✓ Creator profile and niche configuration
- ✓ Target audience and content-goal management
- ✓ Platform selection and publishing preferences
- ✓ Content idea generation
- ✓ Topic and trend suggestions
- ✓ Content pillar/category management

Overview

My Team

- ✓ Content format recommendations such as video, post, reel, article, or story
- ✓ Platform-specific content planning
- ✓ AI-powered content calendar
- ✓ Daily/weekly/monthly planning
- ✓ Publishing schedule management
- ✓ Content prioritization
- ✓ Conversational content planning assistant
- ✓ Natural-language modification of planned content
- ✓ Content idea history and saved ideas
- ✓ Existing content management
- ✓ Performance-data analysis where available
- ✓ Recommendations based on previous content performance
- ✓ Content consistency and frequency tracking
- ✓ Notifications and publishing reminders
- ✓ Calendar and dashboard views
- ✓ Content status tracking such as idea, planned, in progress, ready, and published
- ✓ Analytics and planning reports
- ✓ Export/shareable content calendar
- ✓ Human review and editing before publishing
- ✓ Creator-controlled automation settings
