Management, Notifications, Data Analytics

SCOPE

Daily Operations Management / Workflow Automation / Task Coordination / Operational Decision
Support

DESCRIPTION

Develop an AI-powered operations copilot that helps teams manage and coordinate their day-to-day operational activities. The copilot should understand ongoing work, pending tasks, priorities, deadlines, and operational context to provide actionable recommendations. It should assist with planning, task coordination, follow-ups, status tracking, summaries, and routine operational workflows while keeping users in control of important actions.

KEY DELIVERABLES

- ✓ Operations dashboard
- ✓ Daily operations overview
- ✓ Task and activity management
- ✓ Pending-task identification
- ✓ Priority and urgency classification
- ✓ AI-powered daily planning
- ✓ Task prioritization and recommendations
- ✓ Deadline and SLA tracking

- ✓ Operational workflow management
- ✓ Natural-language interaction with the copilot
- ✓ Context-aware operational suggestions
- ✓ Status and progress tracking
- ✓ Team task coordination
- ✓ Notifications and reminders
- ✓ Daily/weekly operational summaries
- ✓ AI-generated status reports
- ✓ Issue and blocker tracking
- ✓ Escalation management
- ✓ Recurring operational tasks
- ✓ Historical activity tracking
- ✓ Search and filtering
- ✓ Role-based access control
- ✓ Configurable automation rules
- ✓ Operational analytics and reports
- ✓ Audit trail for AI-assisted actions
