Agentic AI

INDUSTRY

Enterprise Productivity / Business Operations
/ Communication

PLATFORM / TECH

Agentic AI, Generative AI, LLMs, NLP, Gmail API,
Web Application, Workflow Automation,
Notifications, Task Management

SCOPE

Email Management / Action Extraction / Task Automation / Follow-Up Management / Personal
Productivity

DESCRIPTION

Develop an AI-powered Gmail assistant that understands incoming and existing emails, identifies actionable items, extracts deadlines and commitments, and helps users manage follow-ups. The assistant should summarize important conversations, identify tasks that require action, draft appropriate responses, track pending replies, and proactively remind users about unresolved or time-sensitive emails. The system should support human review before sending emails or performing consequential actions.

KEY DELIVERABLES

- ✓ Gmail account integration
- ✓ Email synchronization and organization
- ✓ Email classification
- ✓ Important email identification
- ✓ Natural-language email understanding
- ✓ Email summarization
- ✓ Action-item extraction

Overview

My Team

- ✓ Follow-up requirement detection
- ✓ Pending-response tracking
- ✓ Sender and conversation context
- ✓ AI-generated email reply drafts
- ✓ Follow-up email drafting
- ✓ Context-aware response suggestions
- ✓ Human review before sending
- ✓ Task creation from emails
- ✓ Reminder and notification system
- ✓ Follow-up scheduling
- ✓ Priority and urgency classification
- ✓ Conversation history and status
- ✓ Search and filtering
- ✓ Email/task dashboard
- ✓ Action-item tracking
- ✓ Follow-up analytics
- ✓ User preferences and automation controls
- ✓ Secure authentication and Gmail permissions
- ✓ Audit/history of AI-generated actions
