AI-MERCHANDISING-ASSISTANT-FOR-ONLINE-SELLERS

Advanced

General

AI Merchandising Assistant for Online Sellers

Web Development

Agentic AI

INDUSTRY

E-Commerce / Retail / Online Selling

PLATFORM / TECH

Agentic AI, AI/ML, Generative AI, LLMs, NLP, Recommendation Systems, Web Application, Product Catalogue, Sales Analytics, Data Visualization

SCOPE

E-Commerce Merchandising / Product Optimization / Catalogue Management / Sales Analytics / Seller Assistance

DESCRIPTION

Develop an AI-powered merchandising assistant that helps online sellers manage and optimize their product catalogue and merchandising activities. The system should analyze product information, pricing, inventory, sales performance, customer behavior, and catalogue quality to identify opportunities and issues.

The assistant should provide actionable recommendations for product titles, descriptions, categories, pricing, inventory, product positioning, promotions, and catalogue organization. Sellers should be able to interact with the assistant using natural language and review or approve suggested changes before they are applied.

KEY DELIVERABLES

- ✓ Seller profile and store management
- ✓ Product catalogue management
- ✓ Product information and attribute management
- ✓ Product title and description analysis
- ✓ AI-generated product descriptions

Overview

My Team

- ✓ Product attribute extraction
