AI-POWERED-PERSONALIZED-LEARNING-PLATFORM

Advanced

General

AI-Powered Personalized Learning Platform

Web Development

Agentic AI

INDUSTRY

Education / EdTech / Higher Education

PLATFORM / TECH

AI/ML, Agentic AI, Generative AI, LLMs, NLP,
Recommendation Systems, Adaptive Learning,
Web Application, Data Analytics

SCOPE

Personalized Learning / Adaptive Education / Student Performance / Learning Recommendations

DESCRIPTION

Develop an AI-powered personalized learning platform that adapts the learning experience to each student's knowledge level, learning goals, pace, strengths, and weaknesses. The platform should analyze student performance and learning behavior to identify knowledge gaps and recommend appropriate learning resources, activities, and learning paths.

The system should continuously use assessment results, learning progress, interactions, and other relevant learning data to adjust recommendations and difficulty levels. Students should receive personalized explanations, practice activities, and progress insights, while educators should be able to monitor learner progress and provide targeted support.

KEY DELIVERABLES

- ✓ Student registration and profile management
- ✓ Learning goals and preference management
- ✓ Course and subject management
- ✓ Learning-content repository
- ✓ Student skill/knowledge assessment
- ✓ Initial knowledge-level identification

Overview

My Team

- ✓ Knowledge-gap identification
- ✓ Adaptive content selection
- ✓ Difficulty-level adaptation
- ✓ Personalized lessons and explanations
- ✓ Practice-question generation
- ✓ Personalized quizzes and assessments
- ✓ Adaptive question difficulty
- ✓ Learning progress tracking
- ✓ Performance and score analysis
- ✓ Strength and weakness identification
- ✓ Personalized revision recommendations
- ✓ Learning-resource recommendations
- ✓ Natural-language AI learning assistant
- ✓ Student Q&A and concept explanations
- ✓ Personalized study plans
- ✓ Daily/weekly learning goals
- ✓ Progress reminders and notifications
- ✓ Learning history
- ✓ Student dashboard
- ✓ Progress visualization and analytics
- ✓ Educator dashboard
- ✓ Class/student performance monitoring
- ✓ Targeted intervention recommendations
- ✓ Course and content management
- ✓ Recommendation feedback mechanism
- ✓ AI recommendation explanations
- ✓ Reports and data export
- ✓ Role-based access control
- ✓ Secure student learning-data management
- ✓ Model/recommendation performance monitoring
