SCOPE

Teaching Assistance / Assignment Evaluation / Automated Assessment / Personalized Feedback / Academic Performance

DESCRIPTION

Develop an AI-powered teaching and assignment evaluation assistant that helps educators reduce the time spent on routine academic evaluation and teaching-related activities. The system should allow educators to upload assignments, question papers, rubrics, notes, and other educational material, then analyze student submissions against defined evaluation criteria.

The assistant should evaluate objective and subjective answers where appropriate, provide structured feedback, identify common mistakes and learning gaps, and generate useful insights for educators. Teachers should be able to review, modify, and approve AI-generated evaluations before they are finalized.

KEY DELIVERABLES

- Teacher and student profile management
- Course, subject, class, and assignment management
- Assignment creation
- Question paper and rubric upload
- Custom evaluation criteria
- Student submission upload

- ✓ OCR for scanned submissions
- ✓ AI-based answer evaluation
- ✓ Objective-answer evaluation
- ✓ Subjective-answer assessment
- ✓ Rubric-based grading
- ✓ Marks/score generation
- ✓ Partial-credit assessment
- ✓ Answer relevance analysis
- ✓ Concept and keyword matching
- ✓ Plagiarism/similarity detection assistance
- ✓ Common mistake identification
- ✓ Learning-gap identification
- ✓ Personalized student feedback
- ✓ Strength and weakness analysis
- ✓ AI-generated explanations for evaluation
- ✓ Teacher review and score modification
- ✓ Human approval before final grading
- ✓ Assignment-wise performance analytics
- ✓ Student-wise performance tracking
- ✓ Class-level performance analysis
- ✓ Question-wise difficulty/performance analysis
- ✓ Frequently incorrect-question identification
- ✓ AI-generated teaching insights
- ✓ Recommended remedial learning topics
- ✓ Personalized practice recommendations
- ✓ Automated evaluation summaries
- ✓ Student progress dashboard
- ✓ Teacher dashboard
- ✓ Assignment history and version tracking
- ✓ Notifications and feedback sharing
- ✓ Reports and data export
