PLATFORM / TECH

Agentic AI, Generative AI, LLMs, NLP, Web
Application, Market Research,
Recommendation Systems, Data Analytics,
Web Search

SCOPE

Startup Idea Validation / Market Research / Competitor Analysis / Business Feasibility /
Entrepreneurial Decision Support

DESCRIPTION

Develop an AI-powered startup idea validation agent that helps entrepreneurs evaluate and refine business ideas before investing significant time and resources. The agent should understand the proposed idea, target customers, problem being solved, value proposition, business model, and market segment.

The system should assist with market research, customer/problem analysis, competitor discovery, differentiation analysis, business-model evaluation, and identification of potential risks and assumptions. It should generate a structured validation report with evidence-based insights and recommendations for further validation.

KEY DELIVERABLES

- ✔ Startup idea submission and management
- ✔ Problem statement and value-proposition analysis
- ✔ Target customer identification
- ✔ Customer segment analysis
- ✔ Market and industry analysis

- ✓ Customer pain-point analysis
- ✓ Competitor discovery
- ✓ Competitor comparison
- ✓ Competitive-gap identification
- ✓ Differentiation analysis
- ✓ Business-model analysis
- ✓ Revenue-model evaluation
- ✓ Pricing considerations
- ✓ Market trend analysis
- ✓ Risk and assumption identification
- ✓ AI-powered feasibility analysis
- ✓ SWOT-style analysis
- ✓ Validation-question generation
- ✓ Customer interview-question generation
- ✓ MVP feature recommendations
- ✓ Go-to-market considerations
- ✓ Natural-language conversational startup assistant
- ✓ Evidence/source collection for research findings
- ✓ Confidence/context for AI-generated insights
- ✓ Structured startup validation report
- ✓ Idea comparison and version history
- ✓ Validation checklist and progress tracking
- ✓ Dashboard and visual summaries
- ✓ Exportable reports
- ✓ Human review and decision-making controls
