PLATFORM / TECH

Agentic AI, Generative AI, LLMs, NLP, Web
Application, Workflow Automation, Order
Management, Recommendation Systems,
Notifications, Data Analytics

SCOPE

Product Returns / Refund Management / Customer Support / Return Workflow Automation / Order
Resolution

DESCRIPTION

Develop an autonomous AI-powered product return resolution agent that helps e-commerce businesses handle customer return requests efficiently. The agent should understand customer return requests, retrieve relevant order and product information, verify return eligibility based on applicable policies, and determine the appropriate resolution workflow.

The system should support return, replacement, refund, and exchange processes while handling customer communication, return status tracking, and follow-ups. It should use order history, product details, return policies, delivery information, and customer-provided reasons or evidence to assist with resolution. Important or exceptional cases should be escalated for human review.

KEY DELIVERABLES

- ✓ Customer authentication and profile management
- ✓ Order and product information retrieval
- ✓ Return-request creation
- ✓ Return reason collection
- ✓ Product/order eligibility verification

Overview

My Team

- ✓ AI-based return request understanding
- ✓ Return reason classification
- ✓ Image/document evidence support
- ✓ Product condition assessment assistance
- ✓ Return, replacement, refund, and exchange workflows
- ✓ AI-powered resolution recommendations
- ✓ Automated customer communication
- ✓ Clarification questions for incomplete requests
- ✓ Return pickup scheduling
- ✓ Return shipment tracking
- ✓ Refund-status tracking
- ✓ Replacement-order tracking
- ✓ Exchange management
- ✓ Exception and dispute handling
- ✓ Human escalation for complex or high-risk cases
- ✓ Human approval for consequential actions where required
- ✓ Natural-language customer support
- ✓ Return-status notifications
- ✓ Automated follow-up and reminders
- ✓ Customer return history
- ✓ Order and return timeline
- ✓ Return dashboard for support teams
- ✓ AI-generated case summaries
- ✓ Policy and decision explanations
- ✓ Return analytics and reporting
- ✓ Common return-reason analysis
- ✓ Refund/return trend analysis
- ✓ SLA and resolution-time tracking
- ✓ Admin policy and workflow configuration
- ✓ Role-based access control
- ✓ Audit trail of AI and user actions
