Education / Campus Management / Student Services

PLATFORM / TECH

Agentic AI, AI/ML, NLP, Web Application, Mobile Application, Workflow Automation, Notifications, Data Analytics, Dashboard

SCOPE

Hostel Complaint Management / Issue Tracking / Maintenance Management / Student Services / Workflow Automation

DESCRIPTION

Develop a smart hostel complaint management platform that enables students to report hostel-related issues and allows hostel administrators and maintenance teams to efficiently manage, prioritize, assign, and resolve complaints.

The platform should support complaints related to areas such as rooms, electricity, plumbing, sanitation, food, internet, security, and other hostel facilities. AI can assist in automatically categorizing complaints, identifying priority or severity, detecting duplicate complaints, routing issues to the appropriate team, and providing insights into recurring problems.

KEY DELIVERABLES

- ✓ Student registration and authentication
- ✓ Hostel, block, floor, and room management
- ✓ Complaint submission
- ✓ Complaint category and subcategory management
- ✓ Text, image, and attachment support
- ✓ Complaint location/room identification

Overview

My Team

- ✓ Duplicate complaint detection
- ✓ Automatic complaint routing
- ✓ Maintenance-team assignment
- ✓ Complaint status workflow
- ✓ SLA and resolution-time tracking
- ✓ Real-time complaint status updates
- ✓ Student notifications
- ✓ Admin and maintenance dashboards
- ✓ Complaint search and filtering
- ✓ Escalation for unresolved complaints
- ✓ Complaint history and resolution records
- ✓ Recurring-issue identification
- ✓ Hostel-wise and category-wise analytics
- ✓ Maintenance workload analytics
- ✓ Average resolution-time tracking
- ✓ AI-generated issue summaries and insights
- ✓ Student feedback and satisfaction rating
- ✓ Reports and data export
- ✓ Role-based access control
- ✓ Audit trail for complaint actions
- ✓ Secure student and hostel data management
